

TEP Test: Stretch vs Host Velocity Dispersion

Binned Analysis

Stretch vs Host Mass (Standard Test)

SN Ia STRETCH vs HOST σ : TEP TEST

Sample: 1285 SNe

CORRELATION ($x1$ vs $\log \sigma$):

Pearson $r = -0.3254$

p-value = $4.48e-33$

TEP PREDICTION: $r > 0$

(Deeper potential $\rightarrow$ stretched light curves)

VERDICT: CONTRADICTED

$\times$ Opposite to TEP prediction

MASS STEP:

$\Delta x1 = -0.575$

(Negative = standard physics)
